Relació classes per membre grup

Aashish Bhusal
Paolo Milner Segura Neville
Mario Wang

The project is divided into several classes as mentioned in the UML class diagrams of different layers. The class of Models package is programmed individually except the controllers for domain layer and presentation layer which is done by all three members of the team. As the project for us had to be done by 3 members, most of the classes of the presentation layer included the work of all the members of the groups, because it included debugging and changing of various functions which needed help.

Some of the modifications of several functions done by the user can be seen by cloning the gitlab contents as well. If any clarification is needed regarding this matter we will be happy to respond.
